JERR-DAN EXHIBITS ITS COLLECTION OF PROVEN TOWING EQUIPMENT AT THE 2017 AMERICAN TOWMAN EXPOSITION IN BALTIMORE

Discover Jerr-Dan's line of innovative wreckers and deck options at the JD Booth

Hagerstown, MD (November 15, 2017) – Jerr-Dan Corporation, an Oshkosh Corporation Company (NYSE:OSK) and a single brand leader in the towing and recovery business, will be displaying a series of wreckers and carriers known for their smart design, unrelenting performance, and durability at the American Towman Exposition in Baltimore taking place from November 17th – 19th, 2017 at the Baltimore Convention Center. The wreckers on display will be the MPL40, MPL NG, and the carriers include the 20' XLP Alum, 22' XLP Steel, 21' XLP Alum and the 24'x96" 8.5T XLP. Jerr-Dan will be located at booth 611.

“Being prepared to respond in a moment’s notice and getting the work done in a safe and efficient manner is a tough job that requires the right equipment,” said Richard del Campo, Vice President and General Manager of Jerr-Dan Corporation. “We design our products considering our customer’s arduous labor, striving to build exceptional equipment that exceeds their expectations.”

As an industry leader, Jerr-Dan develops top quality designs for each of its wreckers and carriers, keeping the end-user in mind. Jerr-Dan’s high-quality, high-standard equipment are fully tested and validated prior to production. Recognized for their high performance and versatility, Jerr-Dan products are industry leading in both reach and capacity.

- The MPL40 wrecker’s customized features include an 8-ton recovery boom and choice of three wheel-grid packages, having the versatility to handle whatever job is set on its path. It is furnished with safety innovations like the patented LOCKLINK, enabling users to tackle more tows in every shift.
- The MPL NG series is also equipped with the LOCKLINK mechanism, as well as the patented Underlift Level Stop Assist System, allowing the set-up time to be faster than ever before. These wreckers are known for their smart design and unrelenting performance.

- Jerr-Dan's carriers have two material options when it comes to choosing a deck style, aluminum or steel. Single sheet decking on conventional & dual angle steel decks reduces weld joints & potential corrosion points, while the industry's strongest aluminum beds feature exclusive, patented Galvanized Steel Beam Technology™. All decks are available in 20' XLP Alum, 22' XLP Steel, 21' XLP Alum, and 24'x96" 8.5T XLP options.

"Jerr-Dan's team of engineers and designers aim to generate a product as dependable as their professional operators," said Mike VanAken, Director for Jerr-Dan Aftermarket Support. "Our goal is to provide them with the right tools to get the job done effectively, while saving them time to get back to the road faster."
